

**REMARKS**

Reconsideration and allowance is respectfully requested.

In paragraph 1 of the Office Action, the Examiner objected to the specification under 37 CFR 1.75(d)(1) and MPEP 608.01(o) as failing to provide proper antecedent basis for the claimed subject matter. In response, Applicants have amended the specification to include the recitations in the claims pointed out by the Examiner as lacking antecedent basis. Because all of the recitations added to the specification can be found in the originally filed specification in the original claims, no new matter has been added. Applicants respectfully submit that the objection to the specification has been overcome and should be withdrawn.

In paragraph 2 of the Office Action, the Examiner objected to Claims 1, 5, 14, 32, 43, 49 and 60 due to informalities. In response, Applicants have amended these claims in accordance with the Examiner's helpful suggestions. No new matter has been added. Applicants respectfully submit that these Claim objections are overcome and respectfully request that the Examiner withdraw the objections.

In paragraphs 3 and 4 of the Office Action, the Examiner rejected Claims 1-64 under 35 USC 112, second paragraph, as being indefinite. In response, Applicants carefully have reviewed the specific rejections to the claims and have made appropriate amendment to correct these formal issues. Applicants respectfully submit that no new matter has been added and that the rejections have been overcome.

Applicants note that in paragraph 5 of the Office Action, the Examiner indicated that Claims 1-64 would be allowable if rewritten or amended to overcome the Section 112 rejections and other objections. In light of the present amendment, Applicants respectfully request that the Examiner pass all of Claims 1-64 to issue.

Applicants note that in paragraphs 6-7 of the Office Action, the Examiner states that he has considered the references cited in the Information Disclosure Statement but did not see them as teaching and/or fairly suggesting the present invention and that the references cited by the Examiner are cited as showing the general state of the art but are not seen to teach or fairly suggest the instant invention.

Early and favorable action earnestly are solicited.

Respectfully submitted,
